OBJECTIVE

Game Programmer with a strong foundation in **Unity, C#, Python, Java, and Git**. Experienced in building full-stack applications. Seeking opportunities to contribute technical expertise and problem-solving in game development.

EDUCATION

Bachelor of Science (Honours), University of Western Ontario — Sep. 2021 – Apr. 2025
Honours Specialization in **Computer Science**, Minor in **Game Development**
3.8 GPA – Dean's Honour List 2021–2025
Extra-Curricular Activities: Game Development Society, Fashion & Lifestyle Society

SKILLS

Core Languages	C#, Python, Java, JavaScript, SQL/PHP, C/C++, HTML/CSS, R, GDScript
Developer Tools	Unity, Git/GitHub, React, MongoDB, Jira, JSON, JUnit, Godot, Unreal Engine, Blender
Languages	English, French, Romanian, Conversational Japanese

HIGHLIGHTED EXPERIENCE

Junior Quality Analyst - StellarX — Dec. 2025 – Present
OVA — *Hybrid*

- Identified, documented, and verified bugs, fixes, and new features using tools such as Jira and Gitlab.
- Worked closely with developers and cross-functional teams in **Agile Scrum** sprints to support the development and testing of our **SaaS and XR** platforms, including daily standups and release testing.
- Developed a C# automation script to compare **Unity Events** CSV and JSON outputs against internal documentation, helping identify inconsistencies and improve data validation workflows.

Engineer - Sharkarama — Jan. 2026 – Present
Threeclipse Studios — *Remote*

- Developed an Unity C# **editor tool** for JSON data importation and updating of shark-related **Scriptable Objects**, allowing for faster iteration on game balance.
- Engineered a **save system** supporting automatic, event-based, and exit-state persistence for game data, aquarium states, and offline reward tracking.
- Created a shark breeding and attribute framework in Unity C# that combined inherited traits to produce unique stat combinations and progression strategies.
- Integrated **FMOD** for all audio, such as music and sound effects, using a sub-module repository architecture.

Programmer - Recyclamation — Sep. 2025 – Dec. 2025
Threeclipse Studios — *Remote*

- Designed and implemented all systems as the **sole developer** for the project, including **Steamworks** integration in Unity, Steam achievements, and branching game endings driven by player decisions.

PROJECTS

Hold 'Em Up – Developed a murder-mystery deduction game in **Unity**, set in a jazz poker bar for **Brackeys' Game Jam** 2026.2 Took ownership of the entire **3D scene**, including the poker game logic. **Placed 5th in Audio, and 42nd Overall out of 2,241 total submissions!**
Starfisher – Collaborated in a team of six using **Godot** to create a space-themed fishing game for **Concordia University's Cosmic Jam**. Took ownership of **player input (both controller and keyboard/mouse)**, and created the quick-time-event catching minigame.
